Getting ready for college well in advance is the best way to ensure success. While it may seem distant when you are in high school, time has a way to sneak up. Planning your strategy and diligently plugging away at it will minimize the anxiety of trying to do too much at once. In this article, we've compiled a list of 15 tips to help you prepare for college. In practice, they can give you a competitive edge and help you become a stronger candidate for admission to any school you choose.

1. Start preparing for college as early as possible for college preparations should begin as early as the first year. Going to college is a huge personal and financial decision that will have an impact on the rest of your life, and the more time you have to plan, the easier the experience will be. The reception process itself will be smoother with a well-designed plan, and you will have time to create a solid profile to use when it's time to apply.
2. Go for challenging topics While in high school, it may be tempting to choose the simplest classes, but you should try to take courses at mainstream scientists that are somewhat challenging for you. Most colleges will require at least three years of math, social studies, and science and four years of English. Some will want to see two years of learning a foreign language. If you don't meet these requirements for four years in high school, you'll find yourself adding these basic classes to your new college schedule. Meeting these basic academic conditions while you are still in school means you don't have to spend time and money taking them later.
3. Learn the requirements for your degree choice depending on your goals, the academic requirements of your degree may dictate the choices you make about your high school classes. If you choose a major based on potential future income or you just want to explore what you love (or both), make sure you are capable of the job. Reach for your dreams but be realistic too. If you absolutely can't get through the calculus, you may think twice about going to veterinary school or becoming a chemist major.
4. Schedule meetings with your counselor's guide as soon as possible your first point of contact when preparing for college is often your counselor's guide. This person can help you with current academic issues and help you with your personal stressors and worries as well. Your counselor is there to be a link when it comes to college planning and is the perfect person to talk about your goals and aspirations. If you are attending a large school, you may have to be proactive in establishing relationships with your counselor. Don't wait for them to look for you. Instead, set up regular meetings to discuss your goals and concerns about college and take advantage of the whole that they have to offer.
5. Participation in personal activities enriching Most colleges would like to see a comprehensive profile that active participation in public and extracurricular activities. Academic enrichment programs, seminars and summer camps that focus on art, science or music are an excellent option. Volunteering is also an activity that not only looks terrific on the app, but is personally satisfying as well. Whatever you choose, make sure it's something you enjoy.
6. Learn your interests From the best sense relatives have probably been asking you for a very long time what you want to be when you grow up. It's easy to get other aspirations for you to be confused with your own. While your family may have you tied to a lawyer or biologist, now is the time to start figuring out what you want to be. Make a list of your best options, take some career quizzes, and do some online research. Don't worry about making a decision for the rest of your life right now. Explore your own interests, and find out what makes you tick.
7. Read as much as you can, whenever you can coursework at college involves a lot more reading than is required from students in high school. Get used to this increase in workload by increasing reading time during the holidays and summer holidays. Try to read a variety of books, from novels and biographies related to your chosen specialty books that sing a look at your interest and curiosity. A good read also means well rounded, and a love of reading will serve you well, not just in college, but for life.
8. Consider internships offering you the opportunity to explore your interests further by taking part in the learning experience through employment. In an internship, you will do practical work that involves your potential career, allowing you to see what your future may look like in reality. It can be a valuable experience to help you learn more about your likes and preferences and give you a better idea of what you want to choose for a major.
9. Practice Traditional Note Skills Although many students prefer to record lectures using their smartphone, there are many benefits to taking notes the old-fashioned way-by-hand. Studies show that writing notes manually makes you focus, process and save information better. And if you think that writing notes on a tablet or laptop is the same, guess again. Studies have shown that students who take handwritten notes as opposed to hired notes consistently work better overall.
10. Learn how to manage your time wisely college will place many conflicting requirements on your time. You already know how hard it can be to juggle school, work and personal life. If you're still in high school, however, the structure of your home life probably helps dictate some boundaries on your time. The freedom to choose your own schedule, which with college also has its fall. If you are not a naturally disciplined person, you may find yourself learning only during crisis time, a habit that increases stress and anxiety. Set aside some time to learn now and install in stone. Start with half an hour and move on to 90 minutes over time. This one habit can make the task of college scientists much easier in the long run.
11. Developing strong writing skills, even if English is not your strong suit, developing excellent writing skills and grammar will help you glide through many college subjects much easier. Being able to convey ideas and facts in clear language will give you a leg up both academically and professionally. From written exams to academic papers, students who can write well tend to score better and have an advantage over those who miss this critical skill.
12. Start looking at colleges there are more than 4,700 two- and four-year colleges and universities in the US. Naturally, you want to get to the best you can. However, what's best for someone else may not be better for you. Consider your personality and preferences. Do you like big cities or are you more comfortable in the atmosphere of a small town? What about the climate? If you hate the cold, Harvard won't be your first choice. Similarly, northerners may find the University of Florida stuffy hot. Are you someone that gets homesickness easily? Forcing yourself to participate in a university that is a few hours away from home can cause unnecessary anxiety in an already new and stressful situation. Perhaps something closer to home that still gives you the freedom you are looking for in order. Of course, you want to find a school that fits your budget as well. Looking at all your options early on can give you a better idea of your preferences compared to how much you will need to save. It's also the perfect time to visit college fairs and collect phone numbers and as much information as you can.
13. Visit colleges in person Once you have done your research, checking colleges in person is the next logical step and an important part of the training process. The fall and spring semesters of your junior year are the perfect time to visit. Do not try to squeeze them all during the senior year, as this will put an undue load on the already packed schedule. During your visit, take advantage of the full excursions, including classrooms, student accommodation, sports arenas, libraries and recreational facilities. If lunch is offered, try it. Immerse yourself in the experience as much as possible to feel the atmosphere. Check out the surrounding city and its amenities as well. Are there things to do nearby that suit your interests, or is there much to do on campus? You will spend a lot of time at school for the next few years, so make sure it's somewhere you want to be for a while.
14. Preparing for tests Most secondary schools require students to take mandatory entrance tests such as SAT, and most of them administer PSAT as However, even if you take PSAT, it's a good idea to do extra training as well. Colleges look at your SAT score when deciding on admission, so it's in your best interest to score as high a high maybe on this exam. Fortunately, learning to the SAT is a breeze with free websites like Khan Academy where you can take as many practical tests as you want. There are also thousands of interactive videos and tutorials, as well as research tips and quizzes to help you out.
15. Apply for scholarships It is never too early to start applying for scholarships-some have deadlines as early as a year before college starts. Apply for as much as you can as soon as you can. In most cases, you don't need to choose a school before applying. College scholarships are available from a variety of sources, and they are not just for the best students and athletes. Scholarships are available for gamers, vegans, artists, horse lovers, and everything else that you can imagine. Keep in mind that about 50 percent of all scholarships are available to students already attending college, so be sure to keep filling out these apps every year you are in school.
16. Explore your financial assistance options for most students, financial assistance is what makes higher education possible, and exploring your options early on will give you an idea of what you can afford. You will want to fill out the FAFSA (Free Application for Student Financial Assistance) form as soon as possible and learn everything you can about various forms of student assistance including grants, scholarships, work training programs, and loans. Apply for every type of financial aid to see what you are entitled to. When seeking financial help, make sure to meet all the requirements and deadlines to maximize your chances of approval.
17. Make a plan now that you know how to prepare for college, it's time to make a plan and put it into action. The above steps do not have to be taken in order. You can personalize your timeline according to your needs. For this final step, you can purchase a binder with folders to keep all your notes and information organized. The calendar will also be useful. Bequeath your goals and time to complete and start doing something every day with the goal of preparing for college in mind. You may even want to engage your parents, counselor, or trusted mentor to help you go as planned. Final thoughts Preparing for College will not happen overnight. He takes research, hard work, and plans to put everything in place before you even step through the doors as a higher education student. However, starting as early as possible and making the most of your time in high school can give you a competitive edge over your peers and are ready for you emotionally and physically for the tasks ahead.
